

**Pluggable Relays are now available!**

**Relay socket 45739T/...series** consists of a 6.2mm base terminal blocks and pluggable miniature relay with 1PDT contact switching up to 250VAC at 6 Amps.

- Terminal connections are with spring clamps
- Relays are available with the following coil voltages: 5,12,24,48,60,110 VDC; 115 and 230VAC
- Relays can be replaced without interrupting wiring
- Approvals: UL, CE
- List price: 24VDC version...\$15.00

**Relay socket 45740S** consists of a 15.8mm relay base terminal which can take a 1PDT or 2PDT pluggable relay; contact switching up to 250VAC at 10 Amps.

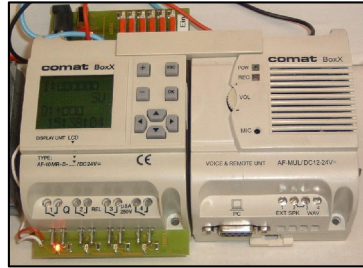

- Terminal connections are screw type
- NO and NC contacts are on the same side of the base (the coil terminals are opposite the contact terminals)
- Side jumpers are available to connect commons
- LED plug modules are sold separately
- Approvals: UL, CE
- List price: Base + relay + plug LED: \$16.00

**Available from the Automation Division of Woertz-USA:**

**Comat BoxX with telephone module**

**Under \$400.00**

**The Comat BoxX AF** ....smart relay controller is available in a 10 I/O unit (6 inputs/4 Outputs) or a 20 I/O unit (12 inputs/8 outputs). The BoxX features an expandable Telephone module for alarms and remote control:

- The telephone module can be programmed to dial out and broadcast up to 98 predefined conditions to programmed phone numbers.
- The Comat BoxX can be controlled remotely by telephone – i.e. forcing an output OFF.

Other Features:

- The BoxX is available with voltage ranges from 12/24VDC to 110-230VAC. The 12/24VDC has Digital and Analog inputs!
- Outputs are relays or solid state transistors
- Programming is done with function blocks on a PC or directly on the LCD
- 127 Function blocks can be stored in memory
- Many useful function blocks can be programmed: timing, counting, plus shaping, calendar function blocks...and more
- Programming software is free of charge and the latest version can be downloaded off the Comat website [www.comat.ch](http://www.comat.ch)
